SYSTEM AND METHOD FOR RESOURCE LOCATOR USING QUERIES

ABSTRACT

Disclosed is an apparatus, including a memory for receiving a resource descriptor, the resource descriptor including a uniform resource identifier (URI) for a particular resource and an associated search query for locating the particular resource; and a controller, coupled to the memory, for initiating an access process for the particular resource using the resource descriptor. A method of retrieving a particular resource, comprising: parsing a resource descriptor into a uniform resource identifier (URI) for the particular resource and an associated search query for locating the particular resource; and initiating an access process for the particular resource using the URI and the associated search query.
